PROFESSIONAL SUMMARY

Digital operations and systems-focused professional with experience across systems transformation, growth automation, digital product delivery, and interface-led workflow improvement. Background combines Computer Science (BE) with Business Management (MA), with hands-on experience coordinating software initiatives, improving operational processes, and supporting automation-led digital environments.

Currently focused on AI workflows, automation systems, product thinking, and operational tooling that reduce repetitive work and improve business efficiency. Open to remote roles and freelance opportunities across AI automation, digital operations, product support, and systems improvement.

CORE SKILLS

- AI workflows and automation support, prompt engineering, workflow design, agent-led process thinking.
- Digital operations, systems transformation, process analysis, cross-functional coordination, Agile delivery.
- Front-end and product support, JavaScript, Tailwind CSS, responsive web design, interface structuring.
- Operational improvement, workflow mapping, data/process review, Airtable and structured systems thinking.

PROFESSIONAL EXPERIENCE

Digital Project Manager – Systems Transformation | University Hospital Southampton NHS FT | Southampton, UK

Aug 2022 – Jan 2026

Led digital change initiatives across software systems and data compliance workflows within a major healthcare environment.

- Reviewed operational data flows and application processes to identify bottlenecks, latency, and workflow inefficiencies.

- Coordinated technical reviews and project delivery across stakeholders, supporting system improvements under strict privacy and data-handling requirements.
- Managed project backlogs, delivery priorities, and Agile coordination to improve execution flow and reduce deployment friction.

Digital Project Manager – Growth Automation | Let’s Get Coffee |
Hybrid
Aug 2021 – Aug 2022

Supported digital growth systems, customer-acquisition infrastructure, and platform improvements designed to improve operational efficiency and user conversion.

- Built automated internal notification loops and asynchronous triggers that reduced manual follow-up across teams.
- Worked on landing experience and checkout-flow improvements using customer behavior insights and conversion-focused digital updates.

Founder & Lead Systems Designer | Maxcreepers Studio Pvt. Ltd. |
Hybrid
Jan 2019 – Jan 2021

Founded and led a digital products and interface studio, translating client requirements into practical design and delivery systems.

- Created design systems, component structures, and responsive front-end experiences for digital projects.
- Improved e-commerce journeys and digital intake flows to reduce friction and strengthen user experience.

EDUCATION

- **Master of Arts (MA) in Business Management** – Middlesex University, London, UK.
- **Bachelor of Engineering (BE) in Computer Science** – MVJ College of Engineering, Bangalore, India.

OPTIONAL ADDITIONAL SECTION

CURRENT FOCUS

AI automation, workflow systems, digital operations, product-oriented tools, and founder-led digital products.
